- d) What is the difference between rowspan and colspan in HTML tables?
- e) Explain the use of form, input, label, select and textarea tags.

Section B – Practical Questions

Q3. Restaurant Menu Webpage

Create a webpage for a restaurant to display its menu.

- Add the restaurant name and a short introduction.
- Create separate sections for Starters, Main Course and Desserts.
- Use headings for each section and lists to display food items.
- Add a relevant image for the restaurant or its food items.
- Use bold and italic formatting to highlight selected items.
- Add the restaurant's contact details and an email link.

Q4. Personal Portfolio Webpage

Create a simple personal portfolio webpage introducing yourself.

- Display your name and a short introduction using heading and paragraph tags.
- Add your profile image with suitable alt text.

- Create sections for About Me, Education, Skills and Hobbies.
- Use ordered or unordered lists wherever suitable.
- Add links to at least two websites or professional profiles.
- Use div and span to group content and highlight important text.

Q5. College Event Information Webpage

Create a webpage announcing a college event such as a technical fest, workshop or seminar.

- Display the event name, date, time and venue.
- Add a relevant event image or banner.
- Write a short description of the event.
- Create an agenda section using an ordered list.
- Add an in-page navigation menu to jump to sections such as About, Agenda and Contact.
- Add an external link for more information or a mailto link for enquiries.

Submission Guidelines

- Write answers for Q1 and Q2 in your notebook or document.
- Create separate HTML files for Q3, Q4 and Q5.
- Keep all required images in a separate folder.
- Submit your practical work as a single ZIP folder.

Best of luck!
